Domain Knowledge: Full Stack Development, Backend Development, RESTful API Development, Database Management, Software Engineering
Areas of Interest: Software Engineering , Backend Development, Cloud Computing

Software Development Projects

Planora | MERN Stack Project | GitHub Nov 2025 - Feb 2026
Team Project · React.js | Node.js | Express.js | MongoDB Full Stack Web Development

· Built a scalable MERN-based task management platform with secure authentication and deadline tracking.
· Developed REST APIs and integrated MongoDB for efficient data management.
· Collaborated using Git and improved application performance through testing and debugging.

PlacementPrep AI – Career & Interview Assistant Oct 2025 - Nov 2025

· React.js | Flask | Python | MySQL | REST APIs Full Stack Web Development

- Developed a full-stack application using React.js, Flask, MySQL, and REST APIs for resume analysis and interview preparation.
- Integrated LLM-based resume analysis and secure user authentication.
- Designed an interactive dashboard for application tracking and interview preparation.

AI-Powered Crop Yield Prediction Platform Jun 2025 - Oct 2026

· Python | Pandas | Scikit-learn Machine learning

- Developed a machine learning model using Python, Pandas, and Scikit-learn to predict crop yield.
- Performed data preprocessing, feature engineering, and model evaluation to improve prediction accuracy.
- Optimized data preprocessing and feature engineering to improve machine learning model performance.
